PROFESSIONAL SUMMARY

Computer Science student and software engineer building reliable, secure, and maintainable systems with TypeScript, Python, PostgreSQL, Docker, and GitHub Actions. Experience includes open-source tooling, system design, automated delivery, and technical leadership.

EDUCATION

QUEZON CITY UNIVERSITY - Quezon City, Philippines

2023 - Expected 2027

Bachelor of Science in Computer Science

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL

Software Engineering: REST APIs, system design, Git, GitHub Actions, Docker, Linux, CI/CD

Frameworks: React, Next.js, Express, Bun, FastAPI

Data: PostgreSQL, PostGIS, Supabase, Prisma, Redis

Testing: Jest, Vitest, Pytest

PROJECTS

QWYKZ | TypeScript, Bun, npm, GitHub

github.com/MarcZxc1/qwykz

- Engineered and published an open-source TypeScript/Bun CLI for generating configurable full-stack monorepos, backend APIs, ORM setups, and authentication presets.
- Designed reusable starter architectures for Supabase, Clerk, and traditional authentication workflows, reducing repeated setup work for new projects.
- Reached 1,763 peak weekly npm downloads and recorded 423 GitHub clones from 131 unique cloners over a 14-day period.

DIFFGUARD | TypeScript, Express, Bun, PostgreSQL, Prisma, Redis, Docker

2026 - Present

- Developing a GitHub App that combines deterministic checks and structured LLM analysis to review pull-request changes for security and maintainability risks.
- Implemented HMAC-SHA256 webhook verification and configured least-privilege access for GitHub App pull-request workflows.
- Designed service boundaries using Express/Bun, PostgreSQL/Prisma, Redis, Zod validation, and Docker for reliable background review processing.

Business Virtual Assistant | React, Node.js, Python, PostgreSQL, Prisma, Docker

2025

- Led full-stack delivery across React, Express, PostgreSQL, and FastAPI services.
- Engineered AI/ML features for inventory risk scoring, demand forecasts, and budget-aware restocking.
- Developed custom mock API services to simulate Shopee, Lazada, and TikTok environments, allowing the system to process e-commerce data without requiring live seller access.

LEADERSHIP & ACTIVITIES

JUNIOR PHILIPPINE COMPUTER SCIENCE - QCU CHAPTER

2024 - Present

Board of Programmers Member

- Plan programming-focused events and hands-on learning activities that help students build practical software-development skills.

QC SCHOLARSHIP PROGRAM | QCYDO

2023 - Present

Tertiary Scholar - Scholarship for Tertiary Students

QC YOUTH VANGUARDS PROGRAM | QCYDO

2023 - Present

Youth Vanguard - Civic engagement, peacebuilding, and volunteerism

TON HACKERS LEAGUE HACKATHON MANILA BOOTCAMP

Nov 15-17, 2024

- Completed the three-day bootcamp and presented The Bug solution at Meridian Innovation Center, Pasay City.
